

To Whom It May Concern

A Leading Supplier of oil and petrochemicals Commodities

About Us :

Salil Arabian was established in 2000 as a trading house specializing in trading, marketing and distribution of fertilizers and fertilizer raw materials. Over the years, our portfolio has expanded to cover grains and food commodities.

In addition to the diversified traded products, we have also expanded our shipping and logistics activities to cover warehousing and distribution in the Ports of Saudi Arabia and other selected markets. The total turnover in 2008 was in excess of 4.5 million metric tons, which has further increased in 2009.

Besides our main offices, subsidiaries and representative offices, Salil Arabia operates internationally through a network of agents covering Europe, the Middle East, East Africa, Asia, and the Indian sub-continent. Salil Arabia is selling its products in over 30 countries annually and has agents / representatives in most of these countries.

Salil Arabian has built up during the years a strong capacity and a strong platform in sourcing Petroleum and Petroleum Chemicals from the major suppliers in Saudi Arabia, which has developed our business group to one of the leading independent companies in exporting below mentioned products. This development has placed Salil Arabian into a new product line supply of Bitumen to the international markets.

Salil Arabia is a member of the following organizations:

- The International Fertilizer Association (IFA)
- The Arab Fertilizer Association (AFA)
- The Grain and Feed Trade Association (GAFTA)

Our Vision:

Salil Arabia and its people will be recognized and respected amongst the leading fertilizers and grains commodities trade houses in the MENA & Indian Subcontinent regions, whilst maintaining its solid constant global presence with its sources and clientele.

Our Mission:

To simply be a leading supply and service trade house in the region, to empower our people with long term careers and deliver value and dividends to our employees and shareholders. Finally to develop strong relation and a strong supply chain to our Customers that our success will be our Buyers success in along term cooperation.

Service:

Our Services are based on five major criteria

- Client-oriented
- Fast turnaround time
- Integrity
- Comprehensive and quality services
- International capability

Inspectorate:

Inspectorate International (Saudi Arabia) Ltd has had a permanent presence in Saudi Arabia for over 23 years. The Company operates under a joint venture agreement with the prestigious YBA Kanoo Group, with offices in Jubail, Ras Tanura and Yanbu, supporting areas such as Jeddah, Rabigh, Dammam and Riyadh.

The company has been a part of the Jubail chemical industry from its start up and was the first independent inspection company to open a permanent office and later a full laboratory. The company was the first Independent Inspection Organization to become ISO certified and is currently registered under ISO: 9001: 2000 throughout the Kingdom of Saudi Arabia for both operations and laboratory, certified by DNV.

Jubail is the hub of our operations where we have a state of the art laboratory capable of providing the complete range of testing on Oil, Petroleum, Petrochemical and Environmental samples. In addition, we have a well established and good market reputation for being able to provide Oil Condition Monitoring (OCM) on various lubricants and service oils. The Jubail laboratory has recently been refurbished and expanded further to allow growth in the key areas of Environmental (inc. water) and Transformer Oils testing.

At the Red Sea port of Yanbu, our laboratory facility opened in 2004, conducting key point analysis on crude oil and various products.
